Original Description: RP states that a leak of natural gas is occurring
near a well head at a storage field.

Update(s): 11/03/2015 09:39:38 AM - DOG has been aware of this release
since October 23rd when the release was reported to them. The release was
venting over a third of an acre due to a plugged line the natural gas was
venting through gopher holes and cracks in the cement. There has been ant
80% reduction of the release since the onset due to unplugging the line.
Per DOG the release will be contained within the next 24 to 36 hours
waiting on special equipment in to handle the release/kill the well head.
; 11/06/2015 08:57:44 AM - Per DOG 2-The well head is in the process of
being capped today equipment is on site. There is still is no threat to
the public. A Well Control Specialist is on scene who is going to remove
the blockage from the well. If all goes well the well should be capped
today. A meeting was held with the public with DOG, Fire, ARB and community
officials present to advise the public reading of the area were below OSHA

exposure levels and explosive gases levels.
